

Working Capital Management *of* Commercial Banks in Bhutan

Tshering Phuntsho

Working Capital Management of Commercial Banks in Bhutan

About the Book

This book is mainly on the working capital management of commercial banks in Bhutan, with focus on short-term cash inflows and outflows. It is an important topic for undergraduate students to learn as it provides adequate resources and guides to the BCom students under Royal University of Bhutan (RUB) and Financial Institutions in Bhutan, especially commercial banks. The book attempts to explain the mechanism by which commercial banks generate short-term funds which includes customer deposits, inter-bank borrowings, and other financial instruments used by banks for short-term assets and liabilities to ensure operational efficiency and profitability. This includes liquidity management, cash flow analysis, and strategies to optimize working capital of an institution.

The book comprises research, including interviews with bank professionals and quantitative analysis, to explore the working capital management practices of commercial banks in Bhutan, highlighting the importance of short-term funds for daily operations. It also explains why effective management of these funds is crucial not only for liquidity but also for maintaining customer and stakeholder trust. Financial institutions, especially in Bhutan will benefit from understanding best practices in working capital management to reduce financial risk and improve cash flow efficiency.
